

far away from lonely

The new single "Far Away From Lonely" from Marcia Barrett is something you will definitely enjoy. After having sold over 200 Million records with "Boney M" during and after the Disco Era she is continuing to ROCK YOU! This is indeed a Rock Ballad with airy instrumentation and vocals, though still has a fierce intensity that builds up to a beautiful crescendo...

Again Marcia expands her versatility in capturing moods into her compositions, along with her co-writer Marcus James. Her interpretation of the song is as follows: *"This piece of work demonstrates strength of a solid non-wavering decision that man and woman can make if such situation arises, feeling that you are all by yourself in one big circle, spinning around not knowing how and when to release yourself of the bondage of continuous pain that has been inflicted on you and not even knowing WHY!"*

This song is actually saying, STAND UP, GET UP, RISE! RISE! RISE! Hug yourself, Admire yourself and thank GOD for the fine qualities that he created in you being a human being of this universe. Being alone does not necessarily mean that one is lonely. Loneliness is a choice of every individual no matter what race, or creed, fat or slim, pretty or not so pretty, handsome or not so handsome for the men, healthy or not healthy, rich or poor so hence! – I'm Far Away From Lonely."

The "B"- side of the release, "By Your Side" is also a Barrett/James composition and Marcia shows her versatility beautifully again in this song.

"Far Away From Lonely" is taken from the upcoming new album and will be available from March 14th, 2011 on:

As well as on: **amazon, musicload.de, play.com,** and many other outlets.
